# Acknowledgements

The production of this handbook was assisted by a review panel: Tony Gent, John Buckley, Chris Gleed-Owen, Nick Moulton, Gary Powell, Mike Preston, Jon Webster and Bill Whitaker (Amphibian and Reptile Conservation); Dave Bird (British Herpetological Society); Lee Brady (Calumma Ecological Services and Kent Reptile and Amphibian Group); John Newton and Martin Noble.

The authors are grateful for input from, and discussion with, many other site managers and reptile ecologists, especially Dave Bax, Chris Dresh, Mike Ewart, Barry Kemp, Nigel Hand, Gemma Harding, Steve Hiner, Peter Hughes, Richie Johnson, Kevin Morgan, Mark Robinson, Mark Warne and Paul Wilkinson. The text benefited greatly from a workshop run by Paul Edgar and Jim Foster at the Herpetofauna Workers' Meeting in 2007 – many thanks to all who contributed.

The copyright of the photographs generously donated for this publication remains with the photographers.

Note that no criticism is intended of any site managers or organisations whose sites feature in photographs characterised here as poor habitat for reptiles. The images have been chosen simply to illustrate key points of principle. Their inclusion here is not a comment on the management or condition of the sites depicted.

Amphibian and Reptile Conservation thanks Natural England for financial support in producing this handbook.

Amphibian and Reptile Conservation is also grateful to the Esmée Fairbairn Foundation for support through the Widespread Species Project.

## **Feedback contact details**

We welcome any suggestions for improving this handbook. Please email [enquiries@arc-trust.org](mailto:enquiries@arc-trust.org) with 'RHHM feedback' as the subject.

# Contents

<b>Summary</b>	1
<b>1. Introduction</b>	3
<b>2. Reptiles of Great Britain</b>	5
2.1. Sand lizard <i>Lacerta agilis</i>	5
2.2. Viviparous or common lizard <i>Zootoca (Lacerta) vivipara</i>	6
2.3. Slow-worm <i>Anguis fragilis</i>	7
2.4. Smooth snake <i>Coronella austriaca</i>	8
2.5. Grass snake <i>Natrix natrix</i>	9
2.6. Adder <i>Vipera berus</i>	10
<b>3. Conservation of British Reptiles</b>	11
3.1. Threats	11
3.2. Legal protection	11
3.3. Biodiversity Action Plan and Section 41 listing	12
3.4. Implications for site managers	12
3.5. Accommodating reptiles within broader conservation approaches	13
3.6. Climate change	13
<b>4. Habitat Requirements</b>	15
4.1. Insolation (exposure to sun)	15
4.2. Shelter from the elements (heat, dry weather and wind)	15
4.3. Shelter during the winter	16
4.4. Food	19
4.5. Shelter from predators	19
4.6. Breeding habitat	19
4.7. Space and habitat connectivity	20
4.8. Habitats providing favourable conditions for reptiles	20
4.9. Habitat interfaces	20
4.10. Habitat succession	21
<b>5. Principles and Planning</b>	23
5.1. General principles	23
5.2. Habitat extent and connectivity	23
5.3. Temporal continuity	24
5.4. Management planning	24
5.5. Site audit	24
5.6. Management objectives	25
5.7. Management constraints	25
5.8. Timing of management	25
5.9. Impact assessments	25
5.10. Management checklist	26
<b>6. Resolving Management Conflicts</b>	27
6.1. Background	27
6.2. Precisely what is the conflict?	27
6.3. Factors to consider in reaching a resolution	28
<b>7. Habitat Management Methods</b>	31
7.1. Overview	31
7.2. Cutting/mowing	31
7.3. Grazing	33
7.4. Controlled burning	36
7.5. Fire control	37
7.6. Scrub and tree management	38
7.7. Bracken management	41
7.8. Managing introduced predators	42
7.9. Research	42

<b>8. Habitat Restoration and Re-Creation</b>	43
8.1. Habitat restoration	43
8.2. Habitat re-creation	43
<b>9. Creating Reptile Habitat Features</b>	45
9.1. Brash and log piles	45
9.2. Hibernation sites and basking banks	45
9.3. Grass snake egg-laying heaps	47
9.4. Sand lizard egg-laying sites	49
<b>10. Opportunities for Reptiles in Specific Land Use Regimes</b>	51
10.1. Farmland	51
10.2. Forestry	52
10.3. Transport corridors	53
10.4. Golf courses	55
10.5. Gardens and allotments	56
10.6. Churchyards	57
10.7. Utility sites	57
<b>11. Species Management</b>	59
11.1. Reintroductions	59
11.2. Reinforcement and genetic management	59
11.3. Invasive reptile species management	60
<b>12. Reptiles and People</b>	61
12.1. Public access and reptiles	61
12.2. Reducing negative impacts	61
12.3. Managing people, pet and livestock conflicts with adders	62
12.4. Responses to adder conflicts	62
<b>13. Survey and Monitoring</b>	65
13.1. Reptile surveys for habitat management	65
13.2. Reptile survey methods	65
13.3. Monitoring reptile populations	67
13.4. Monitoring reptile habitats	67
13.5. National survey projects	67
<b>14. Sources of Information and Advice</b>	69
<b>15. References and Further Reading</b>	71
<b>Appendix: Environmental Stewardship Options</b>	73
